

The air we breathe – air quality measurements by EU staff

Want to know about the **air that you breathe** coming to and leaving from work?

Some of us have **measured** the air quality during our daily commute, as part of a project in collaboration with **VUB and BRAL**. Interesting results emerge regarding **when and where in the city the air is more polluted**, who is more exposed and for how long. The event will host speakers from **VUB, BRAL NGO and University of Hasselt**.

Date and Venue: 4 June, 12:30- 14:00; PLB (rue Philippe Le Bon 3), room 4/56
